- Is your building using excess energy?
- Do you want lower utility bills?
- Are some areas of your building too cold and others too warm?
- Do you want to improve your overall building comfort?
- Do you want to reduce your carbon footprint?

Lightly Treading's team of Energy-Star Auditors will work to diagnose the sources of your building's high utility bills, indoor air-quality risks, and comfort complaints by closely examining:

- Air Leakage
- Mechanical Systems
- Electrical Usage
- Window Type & Quality
- Insulation Type & Quality
- Renewable Energy Options

## Our Services:

*HEAT packages include the following services, each of which may be individually selected to attain your energy goals and optimize the performance of your building.*

- *Energy-Star® Benchmarking Energy Audits*
- *Lighting & Appliance Audits*
- *Combustion Analysis & HVAC Diagnostic Testing*
- *Air Leakage & Insulation Analysis via Blower-door & Infra-red camera testing*
- *Window Performance evaluations for Passive Solar opportunities & comfort optimization*
- *Energy Management and Control Strategies*
- *Educational Presentations to help building occupants learn what's working & what's not & how they can make a day-to-day difference.*
- *Strategic consulting with building managers, maintenance, & architectural personnel on achieving energy-efficient operation*
- *Suggested upgrades for remodeling or new additions to your building or for optimizing performance of the existing structure*

Our full service HEAT Package provides you with a comprehensive performance review & evaluation of your building, including an assessment of occupant behavior. Find out what is contributing to high utility bills, unnecessary environmental impact, and comfort complaints!

## Our Goals:

- *Increased Energy Efficiency* for space conditioning, water heating, lighting & appliance usage
- *Reduced environmental impact*
- *Enhanced safety & health* through improved air quality & fire safety
- *Quality Buildings* with thermal comfort, natural lighting & control of humidity, odor & noise.
